«Un esprit sain dans un corps sain».

Un adage bien connu de tous, gage d'harmonie et d'équilibre.

PackOnline a fait sienne cette maxime en la transposant dans son activité quotidienne: «Un produit de qualité dans un emballage de qualité».

Une adéquation nécessaire pour la crédibilité commerciale.

L'emballage est le lieu par excellence de rencontre entre le client et le produit.

L'emballage protège, conserve mais il informe et communique également.

De purement fonctionnel au départ, il devient attractif et vendeur.

Il est donc primordial de choisir un contenant qui soit digne du précieux contenu. L'emballage, c'est notre affaire depuis plus de 15 ans.

Nous sommes à votre disposition pour vous proposer la solution que vous recherchez en termes de protection, de stockage et de décoration avec un rapport qualité/prix qui respecte votre budget. Notre personnel vous conseillera volontiers sans engagement.

Nous nous réjouissons de votre appel.

A bientôt!

La Direction

«Ein gesunder Geist in einem gesunden Körper»

Diese allgemein bekannte Maxime ist eine Garantie für Harmonie und Ausgewogenheit.

PackOnline hat sie auf die eigene Arbeit übertragen:

«Ein Qualitätsprodukt in einer Qualitätsverpackung» -diese Gleichung ist für die kommerzielle Glaubwürdigkeit unabdingbar. Die Verpackung ist der Treffpunkt par excellence zwischen der Kundschaft und dem Produkt.

Die Verpackung schützt und bewahrt, sie ist aber auch ein entscheidend wichtiges Informationsinstrument. In ihrer einfachsten Form rein funktionell, wird sie bei richtiger Konzeption attraktiv und verkaufsfördernd.

Deshalb ist es grundlegend wichtig, für einen kostbaren Inhalt das entsprechende Behältnis zu wählen.

Verpacken ist unser Geschäft seit 1993.

Wir stehen zu Ihrer Verfügung, um Ihnen die gewünschte Lösung in Sachen Schutz, Stapelung, Dekor und Beschriftung

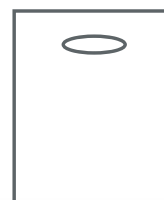

mit einem Preis-Qualitäts-Verhältnis zu bieten, das Ihr Budget respektiert.

Unser Personal berät Sie gerne und ohne jede Verpflichtung.

Wir freuen uns auf Ihren Anruf. Bis bald!

Die Direktion

NEW PP Woven bags

REUSABLE

The **Woven bags** manufactured by us are highly customized and capable to meet client's specific requirements. We are manufacturing PP woven bags in varied attractive colours. They are lightweight and have strong carrying capacities. Our range of woven sacks is available in different sizes and specifications to meet the client's needs. According to the last scientific research, this type of bags has less greenhouse gas footprint in life cycle, comparing to other bag types.

PP

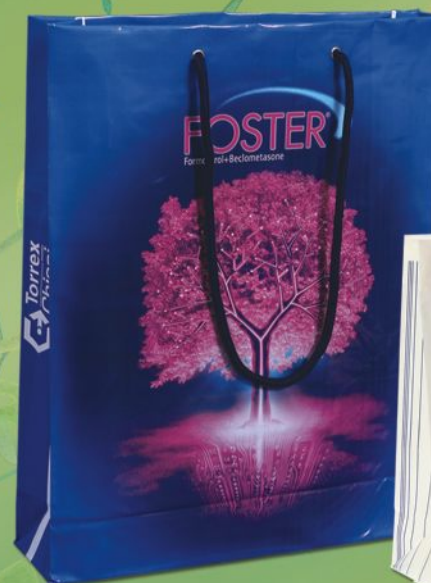

mat/gloss
lamination

long
handles

We offer an exclusive quality of **Plastic bags** with square bottom. They can be made by frosted, transparent or coloured material, w/o high definition printing. Each bag is manual finished with rope or plastic handles. Many brand-protection extras are available as option.

LDPE

HDPE

long handles

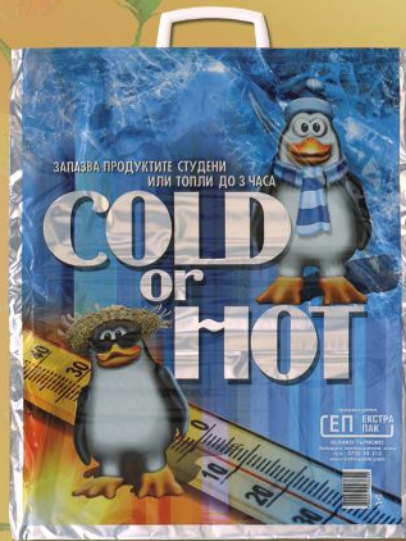

eyelets for handles

GOLD hot stamping

NEW Isothermal bags

Ideal to carry hot or frozen food and beverages, our **Isothermal bags** are solid, eye-catch looking and non-expensive. They have clip-on handles with strong closure, and multilayer structure to prevent heat exchange with the environment.

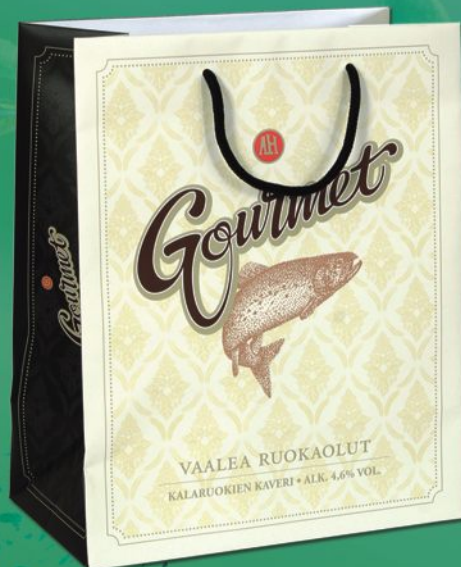

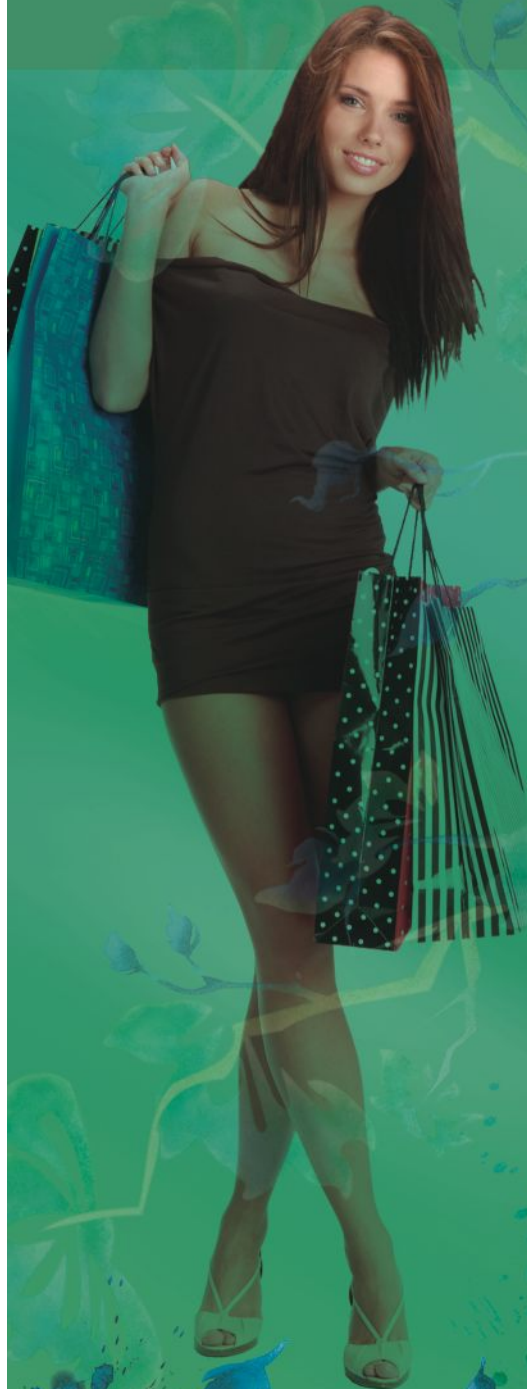

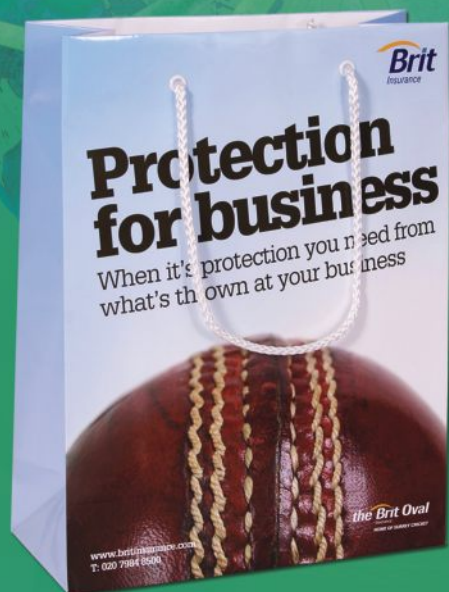

Our **Duffle bags** target are the young, active people. They have one drawstring handle which allow very comfortably carrying on shoulder. Outside printing can be varnished or laminated for high durability.

Luxury paper bags

You can add value to your brand, using our classic hand-made **Paper bags**. We are manufacturing variety range of sizes, using different papers, with many possible extras for added value.

Soft loop handle bags w/o bottom gusset

Very common use in shopping malls, **Soft loop handle bags** are durable, beautiful and practical. We are manufacturing this type of bags using varied polymer materials, colours, sizes, etc.

LDPE

HDPE

CoEx

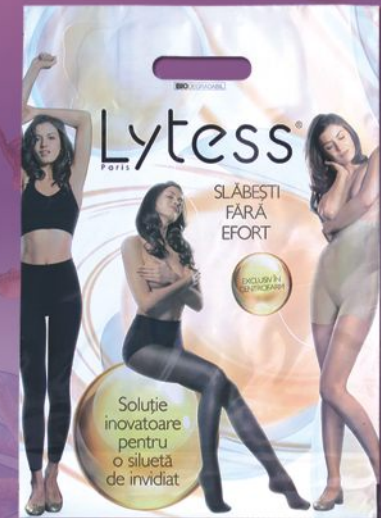

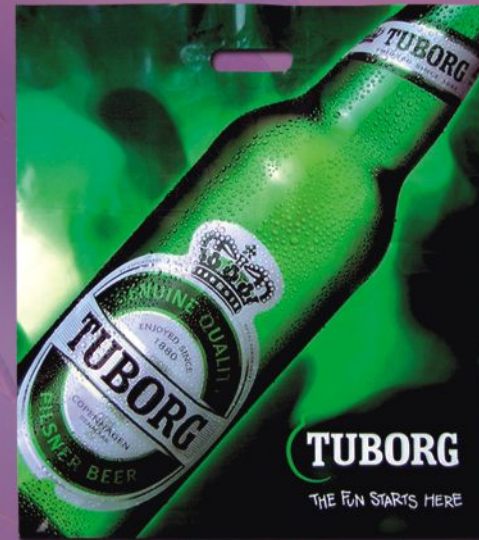

Soft loop handle bags with side gussets

We are manufacturing **Soft loop handles bags** with side gussets. They have boutique-grade emanation, very similar to luxury plastic or paper bags.

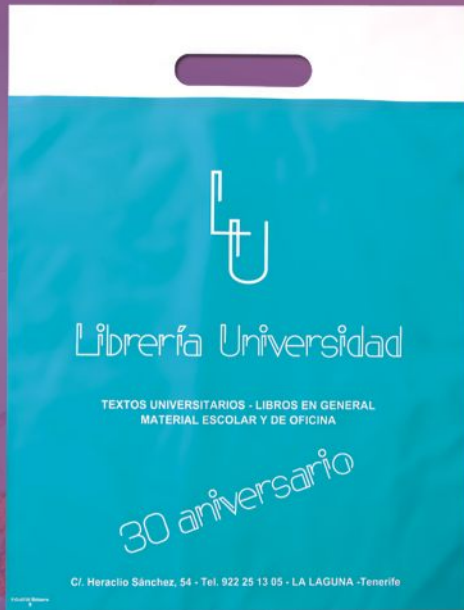

Patch handle bags w/o bottom gusset

We are manufacturing
Patch Handle bags with
glue or thermal reinforcement.
They are very popular for
clothing and gift items. We offer
varied sizes and extras to make
your bags unique.

This is an old fashion bag type, but it is still popular in some countries. Handles are punched on turn-over top, therefore it is stronger than die cut bags.

Die cut bags

Die cut bags are very useful for trade shows, promotional events and shopping purposes. We offer high definition printing and varied sizes and materials for that bags type.

T-shirt bags

This is a wide spread type of bag in supermarkets and stores. It is suitable for carrying of any products – light or heavy, or voluminous. We offer **T-shirt bags** in big size range and varied materials.

HDPE

CoEx

Courier bags

We are manufacturing strong and functional **Courier bags**. As standard they are made by co-extruded polyethylene, and they can have permanent sealing tape, transparent pocket for bill, and perforation for easy opening.

NEW Bags with euro slot

We offer a range of bags ideal for retail display purposes with **euro-slot** hanger or POS hole and a lateral seal if required.

Packaging bags

We offer varied **Packaging bags**, which are usable in many business fields. For example bags for tires, for foods, for chemicals, laundry bags, etc.

Signal tapes

Caution tapes are frequently used in the fields of law enforcement, event's exterior design, safety, construction, painting, mining, hardware and utilities.

Extras

long handles

Long handles are very suitable for carrying bag over your shoulder. We offer varied colours and materials such as polyester, polypropylene and cotton.

eyelets for handles

The **Eyelets** are both stylish and functional - they reinforce handle holes. We offer metallic, white or coloured eyelets. Eyelets are more applicable for plastic luxury bags.

mat/gloss lamination

Lamination is common used surface finishing process, which adds luxury appearance to packagings. We offer both gloss or matt lamination on paper, PP woven and plastic bags.

UV varnish

Very often used in printed media as magazines and packagings, **UV zone varnish** is right way to focus attention on your products. We offer regular and relief UV varnish, as well as pearlescent (with pearl particles inside).

hot stamping

Hot stamping is a dry printing method in which a heated die and foil are used to apply graphics to a surface. Although it is used to imitate gold/silver printing, we offer several other colours.

embossing

We offer ribbed **Embossing** on the paper bags. It gives ripple effect on bag's surface. Other option is Embossed logo or relief.

inside printing

In some cases, especially for brand protection, you can add **Printing inside bags**. This makes your bags unique.

inkjet marking

Inkjet marking. You can add unique mark on your bags with this option. Very usable for promotional codes, dates, bar-codes, etc.

tear-off coupon

The **Tear-off coupon** is configured with the rest of the bag for rapid production and easy detachment from the bag. The coupons are separable from the bag portion due to perforations.

perforation

In many cases **Perforation** can help your customers to open the bags. It's recommended for packaging and security bags. We offer perforations with different tearing effort.

euro slot punch

Euro-slot punches will allow you to create the euros slot shape in your stock in order to display on a variety of hook and slot shape retail shelving.

transparent pocket

Transparent pocket. They are commonly used for the insertion of waybill or consignment notes. The transparency making it possible for bar code scanning.

Materials

LDPE

LDPE (Low Density Polyethylene) - This is the oldest type of polyethylene, which is used for plastic bags. LDPE has good transparency and seal ability. It's common used for Patch Handle Bags, Soft Loop Handle Bags and Die Cut Bags. In North Europe LDPE is still used for T-shirt bags. We can extrude LDPE films with thickness between 18- 180 micr.

HDPE

HDPE (High Density Polyethylene) - HDPE is stronger than LDPE on stretching, but it tears easily. This material is highly suitable for T-shirt bags and Die Cut bags. Also, the thick HDPE (50-90 micr.) is often used for fashion bags. Naturally HDPE is lustreless. The prices of HDPE and LDPE are very often changed on the market. We can extrude HDPE films with thickness between 8- 100 micr.

CoEx

CoEx - We offer 3 layer plastic films for customers, who needs a special characteristic for their packaging. Common use is to make different film colours inside/outside, to increase durability, sealing properties, thermal stability and many other properties.

Degralen

Degralen - It is similar to LDPE and HDPE, but there is additive which makes bag to degradate in presence of oxygen in the nature. The Degralen bags can be used approximately for an year if they are kept in dry , cool storage.

ecomater®

Ecomater - It is based on polylactose from corn. Ecomater bags are biodegradable only in compost environment. Bags made by Ecomater meet the European standard for compostability EN13432

BOPP

BOPP (Bi-axially Oriented Polypropylene) - BOPP is a well-known material for food packaging. Snacks, sugar and many other foods are packed in BOPP films. It has super transparency, very high resistance on stretching, but it can breaks very easy. The BOPP by itself is not suitable for advertising bags. From 30 micr. BOPP we usually produce envelopes and special bags. BOPP has different varieties as lustreless and metallized BOPP, that are often used for laminated films

PP

Woven PP - We offer to our clients bags made of woven polypropylene fabrics. It is the strongest material available for bags manufacturing. Woven PP bags are offered with lamination - gloss or mat and high definition flexo printing.

Paper

Paper - Paper is well known material with long history of using in bags manufacturing. We are using the following kind of papers:

- Kraft, white or brown, plain or ribbed;
- One side coated paper;
- Two sides coated art paper.

Kraft paper features strength combined with natural paper look and feel. Coated grades of paper distinguish superior print quality.
