Packonline.ch Sàrl est une société de droit suisse basée à Sierre en Valais. 

PackOnline.ch société spécialisée dans la fourniture de tous produits d'emballage, tels que bouteilles, verres, cartons, papier photocopie ou imprimante, cabas, emballages de luxe.

Un adage bien connu de tous, gage d'harmonie et d'équilibre. Packonline a fait sienne cette maxime en la transposant dans son activité quotidienne : « Un produit de qualité dans un emballage de qualité ». Une adéquation nécessaire pour la crédibilité commerciale. L'emballage est le lieu par excellence de rencontre entre le client et le produit. L'emballage protège, conserve mais il informe et communique également. De purement fonctionnel au départ, il devient attractif et vendeur. Il est donc primordial de choisir un contenant qui soit digne du précieux contenu.

# FOOD PACKAGING

## A MUST!

### KEY FUNCTIONS

#### Communicate

legal notices and necessary indications about the nature of the packaged product.

#### Contain

enables to preserve the integrity and cohesion of the product: shape, size, volume or quantities.

#### Preserve

ensures the safe and hygienic condition of the content with respect to external constraints: contamination, cooling and heating, lighting, theft...

#### Combat wastefulness

ensuring preservation and organoleptic qualities of the product.

#### Facilitate proper use

by consumers in terms of closing / reopening, convenience and gripping.

#### Sell

by ensuring the product promotion and attractiveness.

#### Forwarding

helps secure and optimize the product transport from the producer to the end consumer and limit logistics impacts, caused by products forwarding.

# FOOD PACKAGING

## AN ENGAGEMENT!

## ENVIRONMENTAL PRINCIPLES

### Eco-design

the aim of this is to design products in line with the principles of sustainable development and environmental friendliness. Each new product is subject to a full life cycle analysis, which allows quantifying and optimizing its environmental footprint.

### Eco-industrialization

the processes used minimize the consumption of non-renewable energy, water and electricity within industrial plants applying a zero-discharge policy.

### Reuse

each package is designed to ensure its domestic reuse (storage, conservation, reheating...) by end users.

### Recyclability

every material used is aimed at being transformed into raw material or energy, depending on existing sorting and recycling units. After use, any packaging remains a noble material, 100 % recyclable.

### Circular economy

as opposed to linear economy, it aims at closing the loop of a product cycle of life, thus reducing its environmental footprint and increasing its recycling.

This is the base of energy transition.

### Citizenship

it deals with the individual and collective eco-responsible behavior of end users. It is the key value, necessary to implement circular economy.

GENERAL TERMS AND CONDITIONS OF SALE

# MATERIAL

It is the responsibility of the purchaser to ensure that the packaging is suitable for the destined end use.  
L'utilisateur devra vérifier la compatibilité de l'emballage avec l'usage auquel il le destine.  
Der Benutzer der Verpackung hat sicherzustellen, dass die Verpackung für den von ihm vorgesehenen Verbrauch verträglich ist.
